

## NETWORK OPERATIONS

Organizations and systems rely on wireline and wireless communications. We will ensure your systems are running on a robust, reliable, high speed, and redundant communication network. The Navjoy Network Team has over 30 years of combined experience building and supporting diverse IT infrastructure. With an emphasis on security, we are experts in planning and implementing LAN and WAN infrastructure as well as Data Center design and support. We can assist in product specifications, demos, procurement, and integration services. We care about the success of our clients, their vision, their ideas and their ability to solve problems.

## Our Services

### NETWORK AND SECURITY ASSESSMENT

- Review the current conditions
